Accelerating Simplicity

Virtual Desktop Infrastructure (VDI) Solution

Solutions made with the U.S. Air Force Air Mobility Command in Mind.

Developed for the unique requirements of the U.S. Air Force, and specifically Air Mobility Command (AMC), ID Technologies offers an Enterprise VDI solution designed to address multiple Air Force initiatives. In addition to enabling server consolidation, ensuring ease of management, and delivering footprint reduction, this VDI solution also optimizes time-to-value and minimizes hassle. Trusted by AMC and AETC, this solution delivers the ease of management your agency needs, within budget and at the right pace, to ensure you can stay focused on your mission.

What makes this solution different from other VDI solutions?

We are a trusted partner to both industry leaders and the latest technologies, allowing access to a depth and breadth of products and solutions other contract holders can't provide

In conjunction with DellEMC and Applied Insights, ID Technologies developed this solution specifically for the Air Force, with a deep understanding of its mission, requirements, and challenges

Allows for customization, build-to-suit and scalability

The solution utilizes "building blocks" which can be combined to address each agencies unique requirements

It is a proven, scalable, world-class Enterprise VDI solution

Why chose to work with ID Technologies?

- We deliver solutions others can't by bringing together the optimal mix of products from technology's proven leaders to its niche innovators

- Our partnerships enable us to bring the best products and solutions to our customers

- With our expansive portfolio of contracts, we streamline the process and minimize time-to-value

- Our strong relationships translate into proven capabilities that will outperform the market at a lower cost to meet AF requirement and budget

- We operate with integrity and are committed to giving customers what they need

Accelerating Simplicity

At ID Technologies we have a clear mission – to make it simpler for our customers to buy and use IT that's fit for their purpose. We don't say that IT projects are ever easy – IT is hard to do well, the stakes are often high and technology is evolving rapidly. But there is much we can do to ease our customers' experience and minimize time-to-value. We call our process "Accelerating Simplicity.

Our Guiding Principles

Differentiation
We work with proven capabilities we know will outperform the market and at lower cost.

Time-to-Value
We make the value of IT spend more quickly accessible to the customer.

Customer Relevance
We work only with partners whose products and approach align with the unique contexts and goals of our customers.

Contact us today to discuss our mission-focused solutions to your industry challenges.

OUR CAPABILITIES

The Cloud
Moving to and working effectively in the cloud is challenging for so many reasons. It's as much about process change as technical implementation. We combine process with technology to ensure our customers can take proper advantage of the flexibility that the cloud offers.

Data Management & Storage
Data growth and use cases are changing at a phenomenal rate. In this environment, determining and managing the critical data can be daunting. We work to create highly efficient ways for our customers to manage exponential data growth and focus on what's relevant to them.

The Internet of Things
Tremendous amounts of machine and sensor generated data offer both great opportunities and major challenges. ID Technologies helps customers optimize their data while navigating the challenges with technologies that streamline process, enhance understanding and strengthen security.

Mobility
ID Technologies blends both software and hardware partner solutions in solving the most complex mobile challenges. Our approach combines market leading technology partners, coupled with ID Technologies service delivery methodologies, to manage and secure complex data environments where mobility is key.

Security
The emergence of the cloud, IoT and mobility has just made networks that much harder to define and secure. At ID Technologies, we help customers navigate through this complex landscape to identify and implement the right compliant solutions for their unique working environments.
